Art Unit: 3682

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it is in excess of 150 words. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No 5628702 to Kotera.
- 4. Kotera discloses a silent power chain transmission apparatus wherein the pitch length P2 defined by the inside tooth faces is longerer than the pitch length P1 defined by the outer tooth faces. Using the convention of the present specification, Hi=Ho+K where K is a positive constant. Kotera does not specify that the constant K is equal to the amplitude Hs of the polygonal motion of the chain. However, the amplitude Hs is a function of the radius of the sprocket around which the chain runs. It would have been obvious to one skilled in the art at the time the invention was made to provide the chain of Kotera with a sprocket creating an amplitude Hs equal to the constant K, as the chain is designed to be used on a variety of different sized sprockets. The tooth edges of the chain and sprocket are profiled to avoid interference with the roots of the sprocket and

link plate, respectively, as seen in Figure 4. The link plates have an arcuate concave bottom surface.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art includes other silent chains which satisfy the expression Hi=Ho+K where K is a positive constant.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Justin Stefanon whose telephone number is 703-305-1945. The examiner can normally be reached on Monday - Friday 6 - 3:30, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A. Bucci can be reached on 703-308-3668. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7687 for regular communications and 703-305-7687 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
